## S3 Diagram Analysis

- Critical Path outlined by arrow for DREAM 63 to the other components starting at DREAM 74 and DREAM 22 as where the other tasks depend on us migrating from MongoDB to SQLite.
- To make sure sprint remains in schedule, we made sure that Before we embark on coding for new tasks, the migration of database had to be done first.
- No unfinished tasks should remain over from previous sprint as all changes to the database should be easy to implement as android makes it easy to code database queries with SQLite
